why BlazeBot?

Blazebot is developed with the idea to ease out HR's tedious manual work load.

The UI has been make user friendly and can be integrated to provide assistance as per the requirements with just a simple task of clicking buttons

Our Website services

Our website has focused on providing assistance to HR during employee onboarding using RPA.

- **Progress Tracking and Reports**

  BlazeBot triggers emails to different departments and the bot automatically reads the response from every department and generates the onboarding checklist therefore helping HR to keep track of onboarding easily.

- **Alerts**

  Alerts will provide aid as a reminder to resume and complete the task on hold.

- **Seamless Communication**

  The BlazeBot aims to maintain the interdepartmental coordination. It will connect all the departments and ensure that all work hand in hand to give you the best service.

- **Secure**

  We have used the best open source resources to provide assistance during onboarding. We guarantee that the data is secure and we respect your privacy.
